

SEWER PIPES

DURALOC

DURALOC pipe is made with a high-strength, high-impact PVC compound and offers greater protection from cracking, leaking, corrosion and other threats, to provide long-lasting infrastructures. H_2S and other aggressive chemicals common in sanitary sewage have no effect on this pipe. Its Manning coefficient of 0.009 allows for use of smaller diameters when compared to other materials.

APPLICATIONS

- Sanitary sewer
- Storm sewer
- Industrial effluent

CERTIFIED TO:

B182.2
DR 28 and DR 35 series

NQ 3624-130
4" and 6" DR 35 and all diameters of DR 28 series
8" to 18" DR 35 and all diameters of DR 26 series
